Subject: RMGT 10th anniversary special events flash report

On 26th March, RMGT held the 10th anniversary open house and could receive and welcome 154 valued guests from 24 countries.

Our company RMGT was established as a joint venture of two companies collaborating with Ryobi Limited and MHI-PPM in January 2014. Taking this opportunity, we thank you for your great support and patronage, we can celebrate our 10th anniversary.

At the open house, we showed our new features, such as automation features of packaging and autonomous printing for commercial and publishing products. In addition, we showed a concept of a smart factory using AGV (Automated Guided Vehicle) connection and we RMGT could show a solid proof of the advanced technology to the audiences.

We also showed our new No. 3 manufacturing factory, which was completed in October 2023.

Under current tough circumstances, RMGT only amongst all the printing machinery suppliers decided to expand our production capability for promoting development and further production efficiency. We are sure that the customers are confident in RMGT's further potential and quality assurance during the open house event.

We held a welcome dinner party the day before prior to the Open house and Get-together at Fukuyama New Castle Hotel in the evening on the same day of the Open house, and we do hope everybody enjoyed the wonderful evening.

Our next stage is drupa 2024 in May to June 2024.

We RMGT are now ready to show off 2 presses to demonstrate and operate our new features with those machines at the show premises.

Stay tuned ahead and have great fun for the next event!!!
